IHC-validated Antibodies

GeneTex is proud to introduce its HistoMAX[™] product line consisting of monoclonal antibodies specifically vetted for IHC. All of these reagents were extensively evaluated using formalin-fixed human normal tissues (more than 70 different sections) and cancer tissue arrays to guarantee specificity and best-in-class performance. Only antibodies that have passed these stringent performance criteria for IHC are added to the HistoMAX[™] portfolio. Information regarding both manual and autostainer (Dako/BOND RX/Ventana) staining protocols is also included.
